ABOUT DR. MICHAEL OSIT: Michael Osit is a licensed clinical psychologist who has worked with children and adolescents for more than three decades. His talk will provide strategies that can be used to address the unique issues faced by children surrounded by infinite choices...and very few limits.

Thanks to technological advances including computers, the Internet, cell phones, and satellites, today's children are faced with a world markedly more complex — and often distracting — than that of any other preceding generation. Generation Text examines why and how this phenomenon shapes children's values, attitudes, and behavior in a way that is fundamentally different from previous generations...and provides strategies for coping with the particular challenges of growing up in the new millennium. His discussion will help parents who want to ensure that their children successfully develop key social skills, a healthy identity, and a strong work ethic needed to make the right choices.
